Efes Nexus

Promo Management Platform

A single platform that replaces manual work in Excel and Outlook with end-to-end digital processes, automated notifications and AI verification of partner requests.

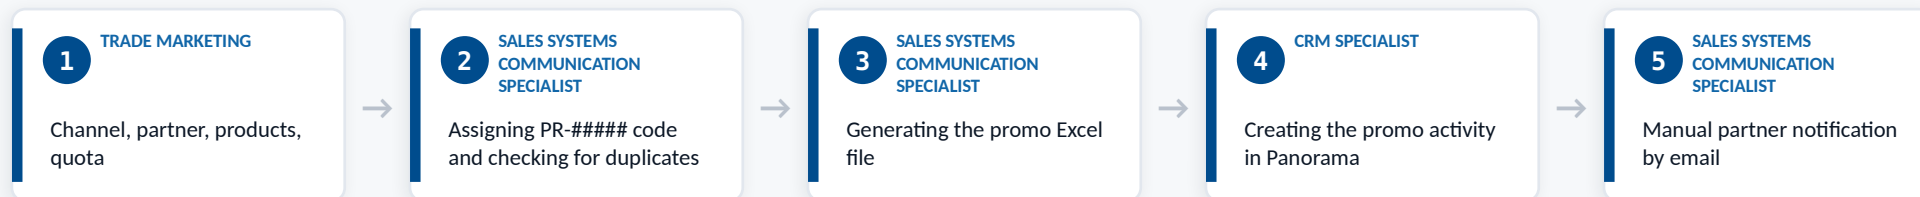

- Promo activities

- 3 business processes

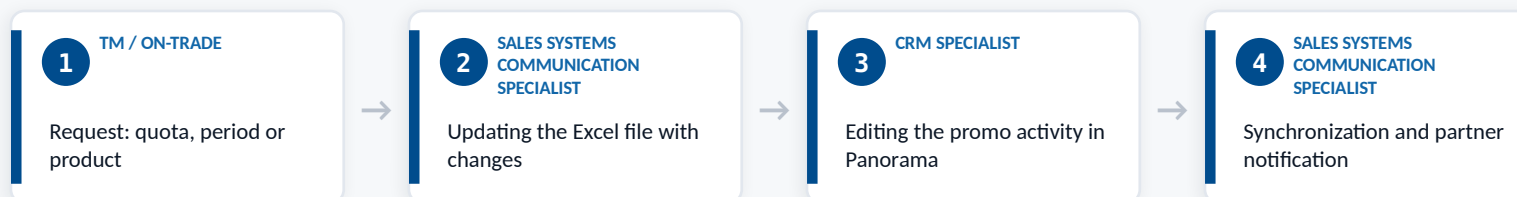

Promo activity lifecycle — today

Steps of the BPMN diagram and the responsible roles — how the process works today.

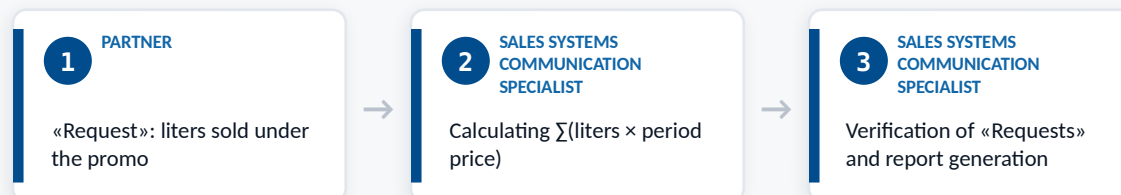

01 Creating a promo activity

02 Modifying a promo activity

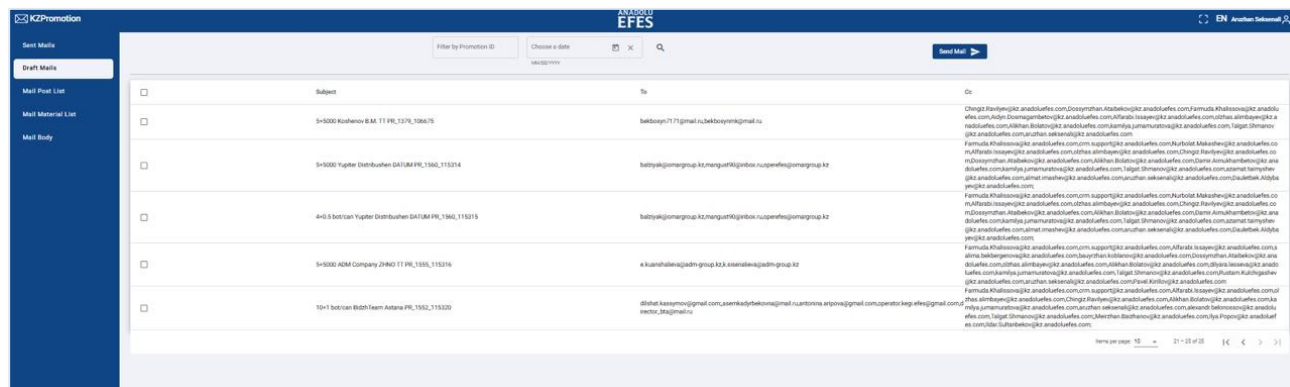

03 Month-end closing and calculation

The current KZPromotion system — and its limits

Today partner notifications for N+1 promos are sent by KZPromotion. It covers only a small part of the process and still requires constant manual work.

KZPromotion — partner notification mailing for N+1 promos

N+1 only

All other promo activity types are not supported.

Manual selection

The Sales Systems communication specialist picks promo activities for mailing by hand.

OPERATIONAL ISSUES

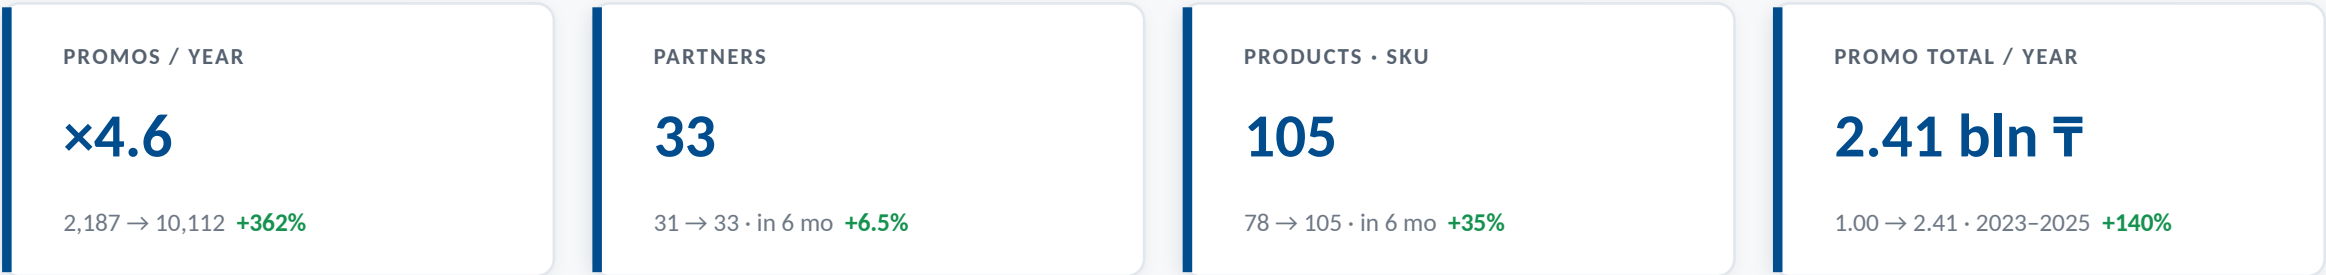

- Microsoft changed its internal policies — emails stopped going out, and notifications had to be sent manually.
- Minor failures occur frequently.

Quota changes only — automatic

Notifications about period or product changes have to be sent to partners manually.

The main effect — time returned

Promo volume grew almost 5× with the same team. The platform gives specialists their working time back by taking over the routine.

158 h/mo

of working time returned · Year 1

28% of routine automated

The platform moves data between Excel, Panorama and partner emails by itself. Specialists put that time back into working with partners and checking calculations.

Promo activity lifecycle — with Nexus

Steps of the BPMN diagram. **Blue** marks what the system does; **gray** — human actions and decisions. **Red** — a new step that does not exist today.

System functionality – N+1, N+KZT

Before:

Scattered Excel files and email communication

(No single source of data, with communication run over email → Trade-marketing specialist – SSC specialist – CRM specialist – SSC specialist – Partners)

Promo Status reports are created manually

(A significant time burden on the employee)

Code assignment, compensation calculation and verification of a large volume of requests in a non-automated process

(Risk of duplicates, overpayments and distortions in reports)

Dependence on the human factor

(300+ promos per month)

After:

A single system to manage promo processes

(A single registry and all communication in one space → full transparency, instant synchronization and no loss of information)

Automated reporting

(Reports generated and sent in seconds → real-time analytics and fast decisions)

Smart calculation and coding algorithms

(The system assigns the code itself, checking for duplicates and product availability in the distributor's warehouse, and calculates the compensation by reconciling it against partner requests)

Minimizing the human factor

(A standardized and transparent process → predictable results and lower risks)

The promo dashboard

“A single window for the entire promo-activity lifecycle — from the partner’s request to the compensation calculation.”

The screenshot displays the 'Efes' promo dashboard. The left sidebar contains navigation links: РАБОТА (Promo-activities: 24), Заявки партнёров (4), СПРАВОЧНИКИ (Партнёры: 38, Продукты: 10, Отчёты, Настройки). The main area is titled 'Управление промо-активностями · Промо-активности' and includes a search bar. Below the title, there are three filter panels: 'ДИСТРИБЬЮТОР' (with buttons like BAT Pavlodar, Bridge Team, HAT Logistics, etc.), 'КАНАЛ' (with buttons like Дист, Оптовая торговля, Снец/Терас, etc.), and 'БРЕНД' (with buttons like Efes, Goldberg, Karmen, Stella). A table below these filters shows the status of 4 promo-activities, with a summary row indicating a total quota of 13,138 L and a realization of 4,378 L (33%).

ДАТА НАЧАЛА	ДАТА ОКОНЧАНИЯ	ПРОМО	КВОТА, Л	РЕАЛИЗ., Л	ОСТАТОК, Л	РЕАЛИЗ., %
26.01.2026	26.04.2026	PR-10428 N+T · ReMalto Efes · Точка продаж (Нондатур)	338	338	0	100%
13.04.2026	12.06.2026	PR-10421 10+1 · ReMalto Efes · Точка продаж (Датум)	4 500	2 840	1 660	63%
28.04.2026	27.06.2026	PR-10435 12+1 · ReMalto Efes · Точка продаж (Датум)	6 500	980	5 520	15%
29.04.2026	28.06.2026	PR-10444 10+1 · ReMalto Efes · Точка продаж (Датум)	1 800	220	1 580	12%
Итого			13 138	4 378	8 760	33%

Live recording of the platform

Phase 2 • Platform development

The platform is already live — the optional Phase 2 (5,000,000 KZT) extends it: AI search over promo history, 1C invoice validation, new calculation types and a promo calendar.

1,600,000 KZT

AI Search & Knowledge Base

Search and answers to questions about current and historical promo activities.

Example: “Which promos ran for Ulba in July 2024, 2025 and 2026?”

1,500,000 KZT

1C Invoice Validation

Automatic validation of exports and invoices from 1C.

Effect: –30% of trade & sales-controlling specialists' time; checking 1C from every point manually — ∞ hours.

800,000 KZT

Historical Promo Calendar

A calendar of all current and historical promo activities.

How it works: clicking a date shows the activities that were active in that period.

1,100,000 KZT

Scaling the calculations

Extending calculations to other compensation types — e.g. the Kega Boom calculation.

Foundation ready: shared quota, price and period logic is already in the system.

New mechanics plug straight into the platform. The full development package (Phase 2) — 5,000,000 KZT; modules can be started separately.

The project team

The project is delivered by a team of 5 engineers — led by the founder of the project, who owns the architecture, the key technical decisions and the quality of the result.

Aset Seksenali

Project founder • Team lead

Senior full-stack engineer • 8+ years of high-load production systems.

Architecture • decisions • quality acceptance

Halyk Bank

online banking: 100,000+ business clients, 20+ features shipped

Archimedes • CTO

nationwide medical platform — up to 5,000 RPS, 5 regions

Zencoder • USA

AI tools for developers: VS Code and JetBrains plugins

Lumica • CTO

LMS platform: 15+ microservices, up to 3,000 RPS, a team of 5 engineers

The team: team lead + 4 developers

backend • frontend • DevOps • QA — a single point of accountability for the result

Project cost

A fixed price in two phases: Phase 1 — development and rollout of the system; Phase 2 — an optional development package. Hosted on Efes infrastructure, with no hosting costs.

PHASE 1 • DEVELOPMENT AND ROLLOUT

5,000,000 KZT

fixed price · VAT not included

- 8 system modules and 3 end-to-end BPMN processes
- Integrations: Panorama, 1C, corporate email
- AI verification of partner requests
- Deployment on the Efes server and team training
- MVP — in just 6 weeks

PHASE 2 • PLATFORM DEVELOPMENT (OPTIONAL)

+ 5,000,000 KZT

separate agreement · modules in any order

- AI Search & Knowledge Base — **1,600,000 KZT**
- 1C invoice validation — **1,500,000 KZT**
- Scaling the calculations (Kega Boom) — **1,100,000 KZT**
- Historical promo calendar — **800,000 KZT**
